Embroidery Preview Generator

User guide for subscribers

Website: **studio.neurocraft.art**
Your photo or a few words — and in about a minute you have an embroidery preview. Nothing to install: everything runs on our computer.

16. If something goes wrong

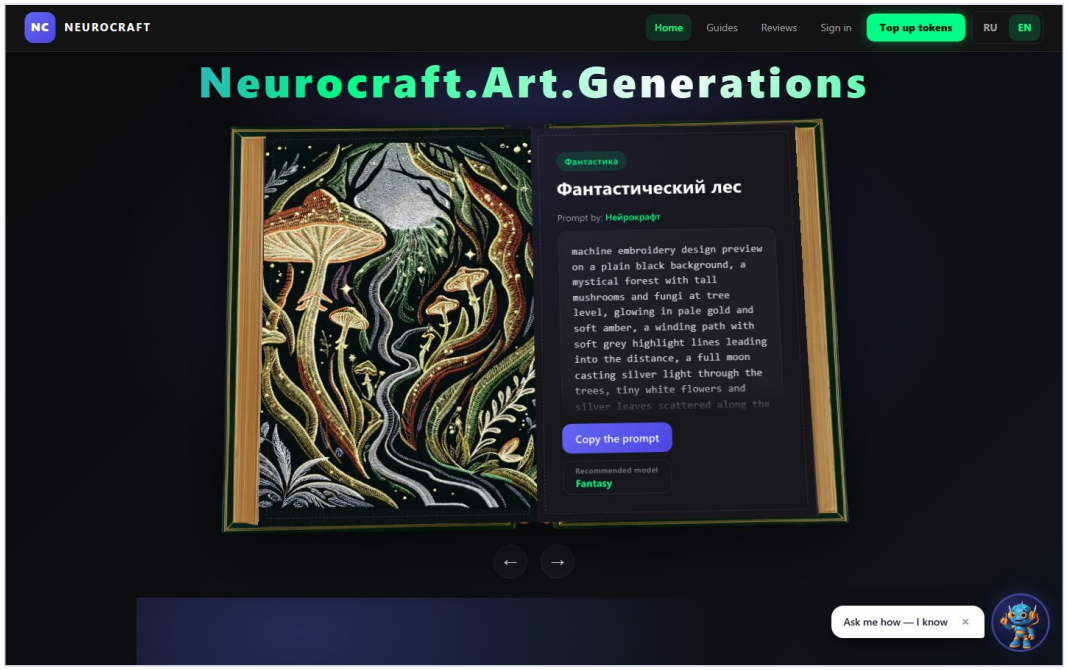

> Everything happens in the browser — on a computer or a phone. All you need is an email and a few minutes. No account yet? It opens by itself as soon as you top up tokens (section 3). The site has an English version: use the **EN** switch in the top right corner.

1. What the generator is

The generator turns your photo or your text description into an embroidery preview. It has six sections:

- **Photo to stitches** — works with your photo: turns it into stitching on a black or white background, or removes the background.
- **Photo to watercolour (stitches)** — your photo as watercolour embroidery on a grey background.
- **Watercolour** — draws from a description in a watercolour manner.
- **Neuro-stitch** — draws thread embroidery on a dark background from a description.
- **Fantasy** — gold and coloured threads, sparks and glints.
- **Gzhel** — cobalt blue on white.

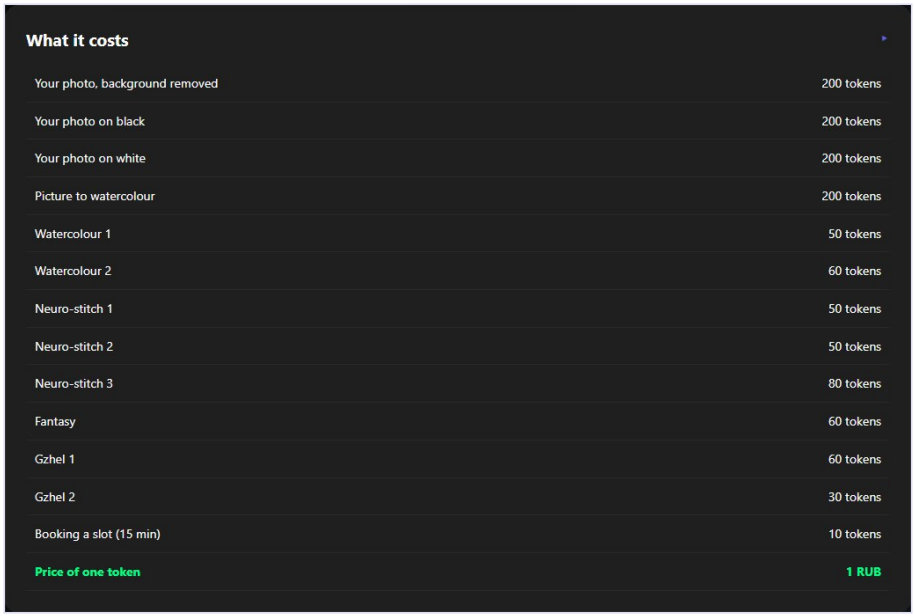

Everything is computed on our powerful computer. You do not need a graphics card and there is nothing to install — an ordinary browser is enough.

The home page. At the top — a book of sample works with their prompts; the «Sign in» button is on the right in the menu.

How it works

- Generation time is **booked in advance**: you pick a slot in the schedule and generate as much as you can within it.
- You pay with **neurotokens**. One token costs one rouble. Tokens are spent on booking time and on each picture.
- One picture takes about a minute.
- Finished pictures stay in your account for 24 hours — download the ones you like before then.

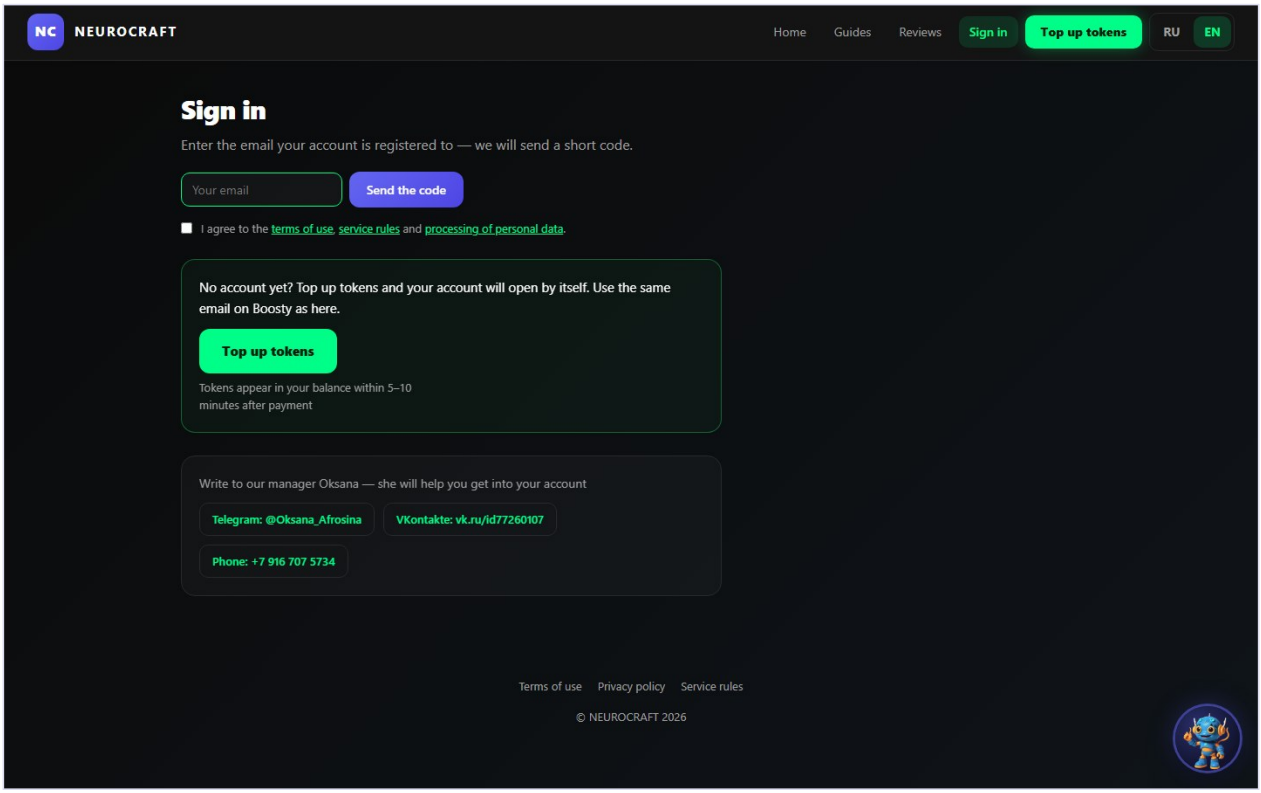

Prices on the home page, under «What it costs»: booking a slot and each model.

2. Signing in

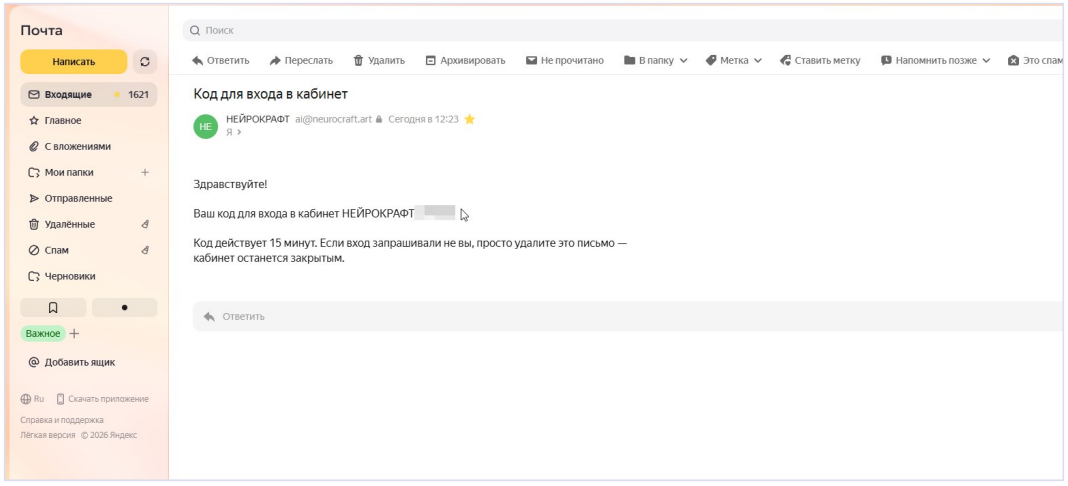

There is no password. Instead, a short code is sent to your email every time you sign in.

1. Click **«Sign in»** in the site menu.
2. Enter the email your account is registered to.
3. Tick the agreement box — without it the sign-in will not open.
4. Click **«Send the code»**.

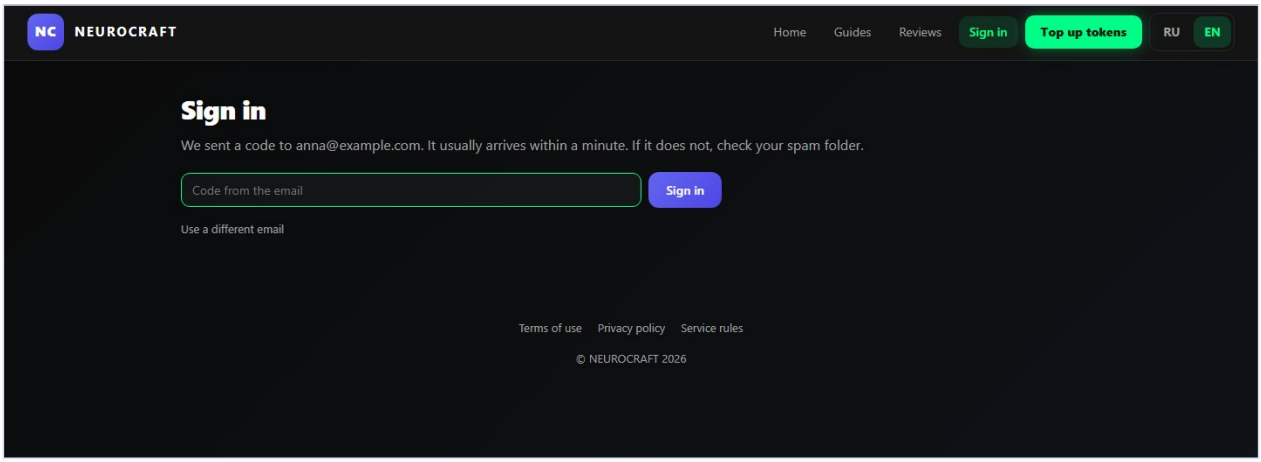

The sign-in page: email, agreement box, «Send the code» button. Below — the «Top up tokens» button for those who do not have an account yet, and the manager's contacts.

5. An email with a six-digit code will arrive. If there is no email after a couple of minutes, check your Spam folder.
6. Type the code into the **«Code from the email»** field and click **«Sign in»**.

The email with the code. The code is valid for 15 minutes.

The field for the code from the email.

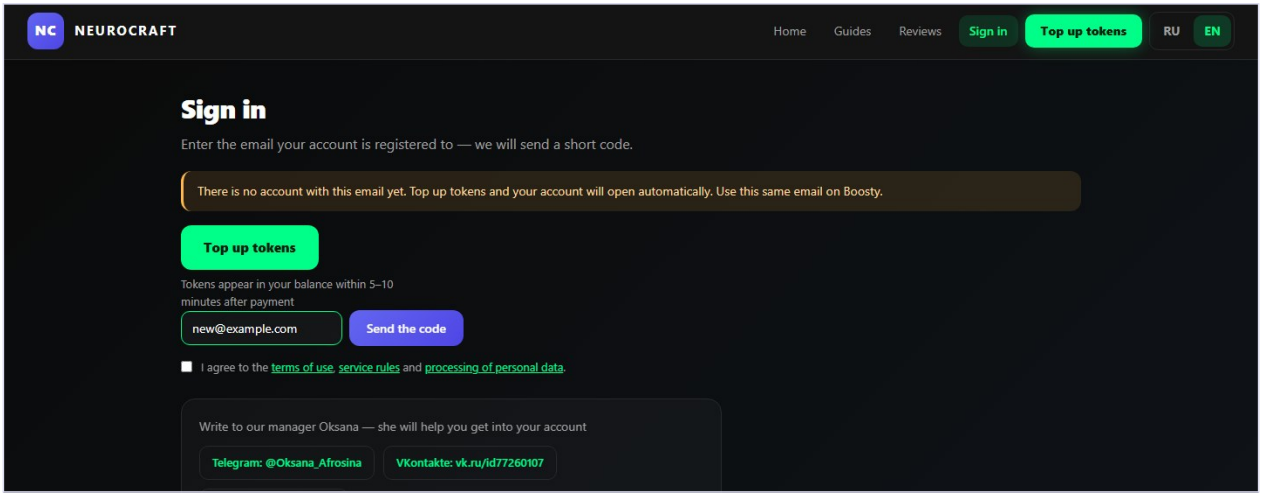

How the code works. It is new every time and can be used only once: after you sign in, it no longer works. It is valid for 15 minutes and expires after five wrong attempts — then request a new one. While the previous code is still valid, clicking «Send the code» again will not send a second email — this is protection against mix-ups, not an error: enter the code from the first email.

In this browser the site keeps you signed in for **a month**, until you click «Sign out». On another phone or computer you will need your email and a new code again.

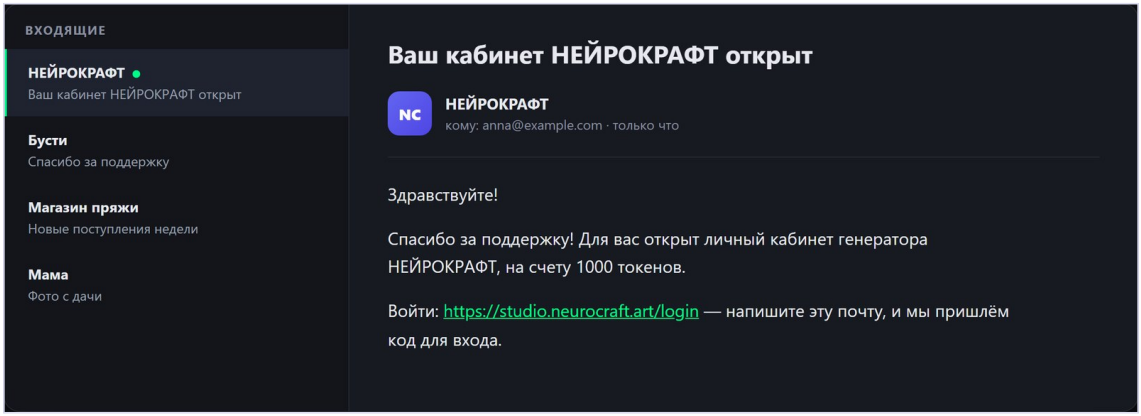

3. If you do not have an account yet

Your account opens by itself as soon as you top up tokens. There is no need to write to anyone.

1. On the sign-in page click the green **«Top up tokens»** button. If you have already entered your email and the site replied «There is no account with this email yet», the button is right below that message.
2. Boosty opens with the «Кормим видеокарту» goal (“Feed the graphics card”). Enter an amount: **as many roubles, as many tokens**. Any amount will do.
3. Pay. **Your Boosty email must be the same** as the one you will use to sign in: the account is opened for that email.
4. In 5–10 minutes you will get an email «Your NEUROCRAFT account is open». Sign in as usual — email and code (section 2).

The email has no account yet — the site offers to top up tokens.

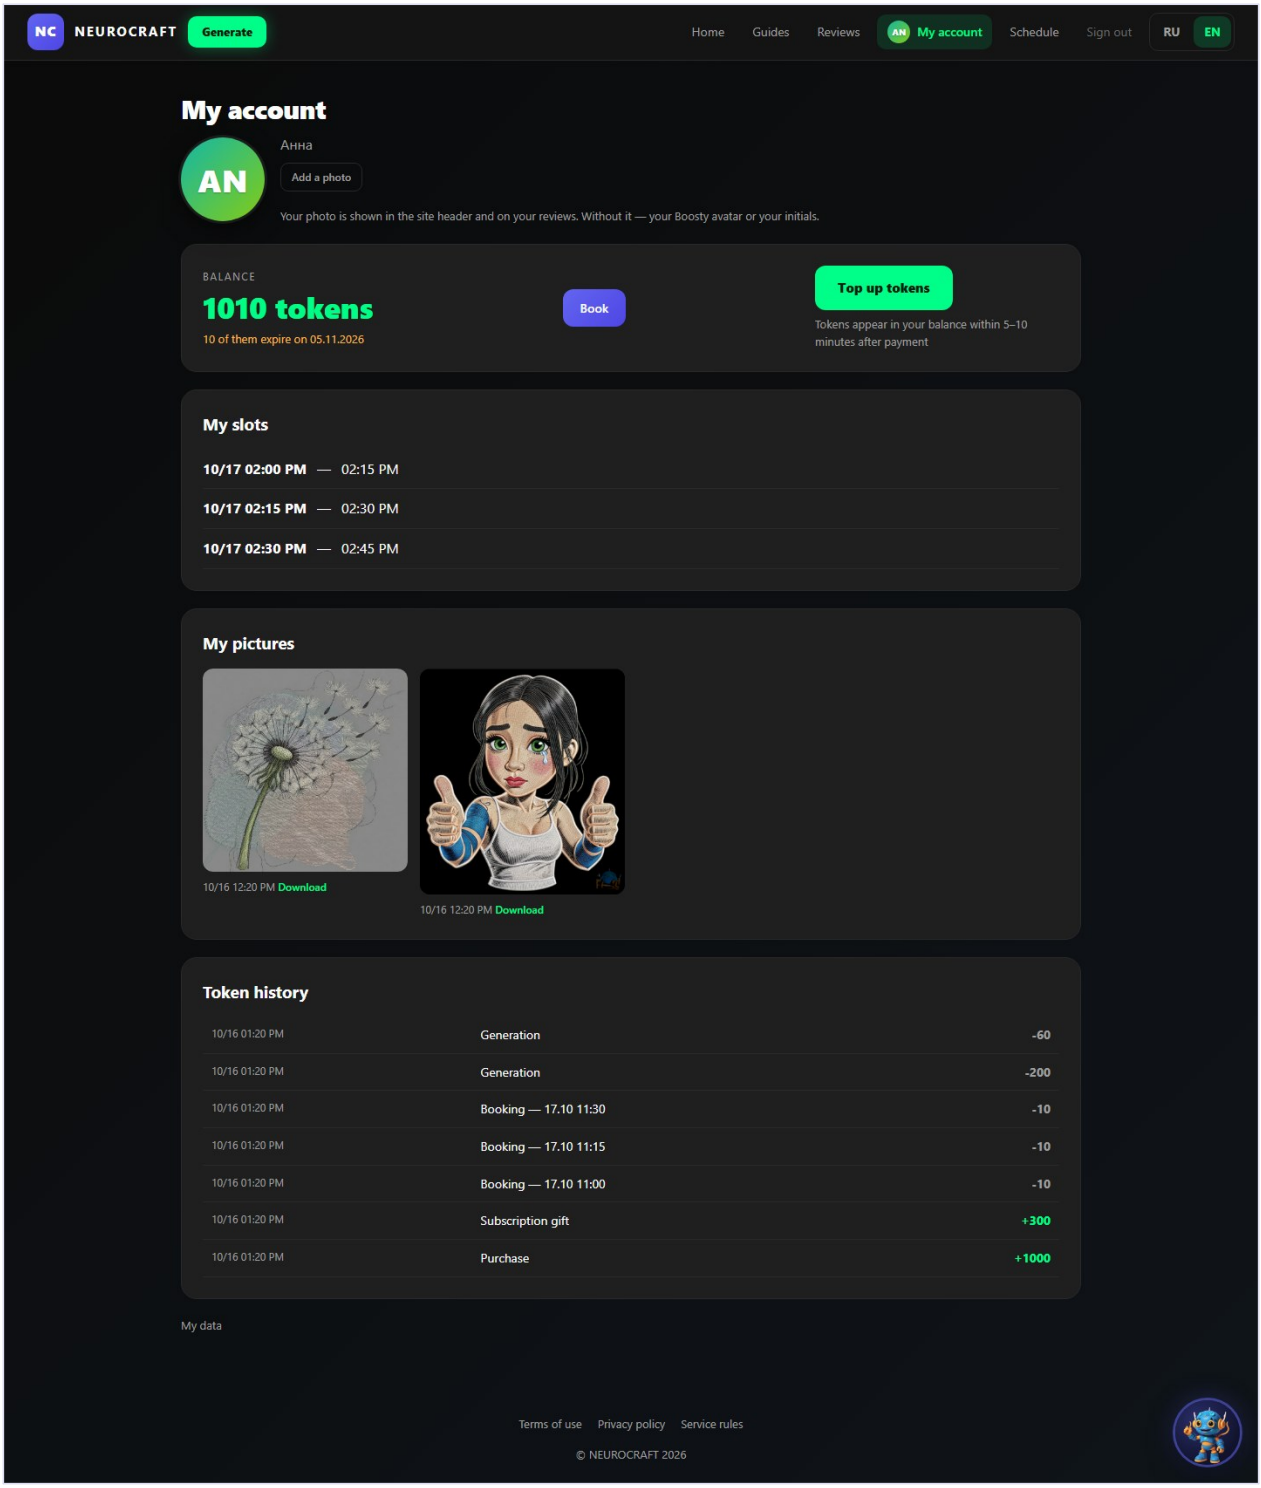

The email «Ваш кабинет НЕЙРОКРАФТ открыт» (your account is open): the account is ready and the tokens are in. The email is in Russian.

> Tokens do not arrive instantly: the site checks payments every few minutes. If the account has not opened after 15 minutes, check which email is set on Boosty and write to the manager.

4. Your account and neurotokens

Neurotokens are the generator's internal currency. Everything that happens to them is visible in your account:

- **Photo** — the «Add a photo» button next to your name. Without your own photo, your Boosty profile avatar is shown, and if there is none — your initials on a coloured circle. The photo is shown in the site header and on your reviews.
- **Balance** — how many tokens you have right now.
- **Top up tokens** — the green button next to the balance (section 5).
- **My slots** — the time you have booked.
- **My pictures** — everything you made in the last 24 hours, with a «Download» button.
- **Token history** — what was bought, what was gifted, what went to bookings and pictures.

The account page: balance with the top-up button, booked time, pictures and history.

Bought and gifted tokens

- **Bought** tokens («Purchase» in the history) never expire.
- **Gifted** tokens (for example, «Subscription gift») are valid for a limited time. If some are about to expire, the account says so right under the balance.
- Tokens that expire sooner are always spent first — that works in your favour.

> Tokens are spent on two things: booking time and each picture. Each model has its own price, written right on the model button and on the home page.

5. Topping up tokens

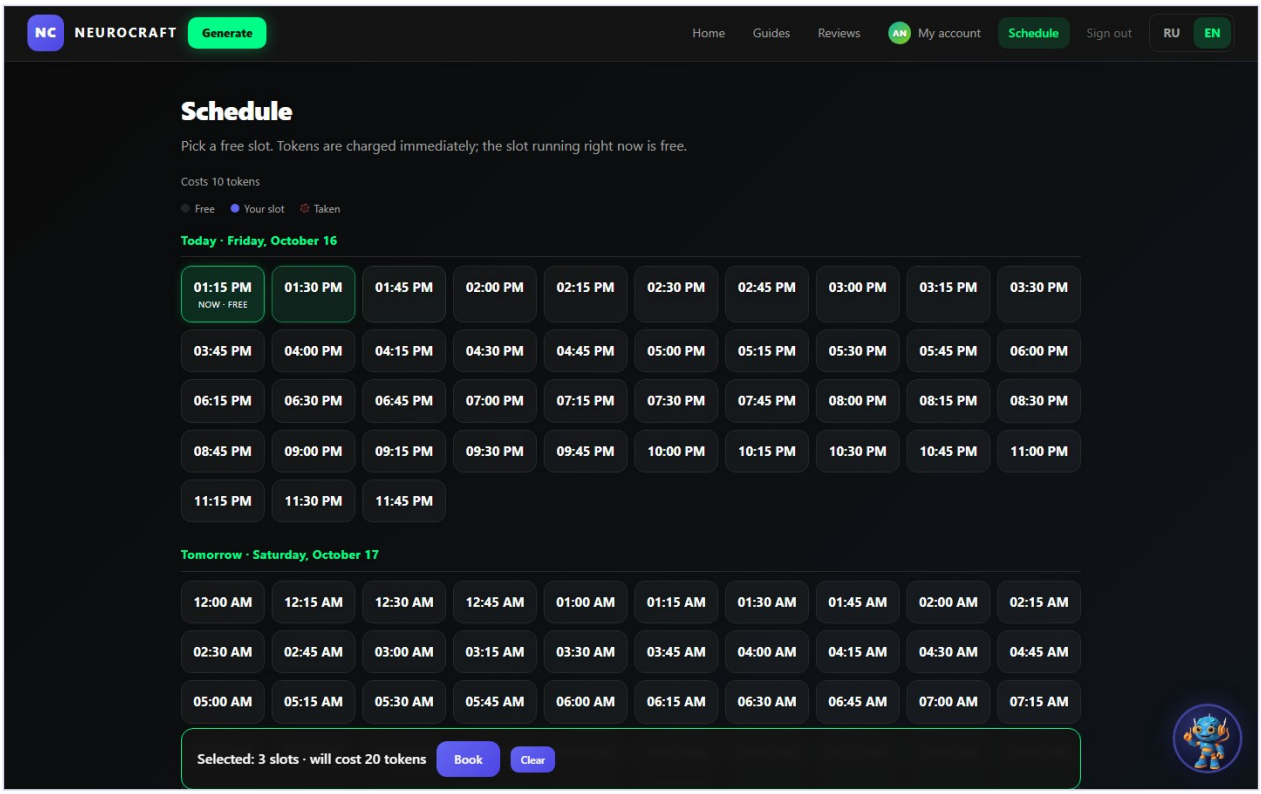

1. Click **«Top up tokens»** — the button is in your account and on the generation page, next to the balance.
2. On Boosty, in the «Кормим видеокарту» goal (“Feed the graphics card”), enter an amount: one rouble — one token.
3. Pay. Your Boosty email must match your account email.
4. In 5–10 minutes the tokens appear in your balance, and a «Purchase» line appears in the history. Refresh the page.

> Bought tokens never expire — you can top up in advance, as much as suits you.

6. Booking time

The generator works by appointment so that pictures do not wait in a queue. Time is divided into fifteen-minute slots.

1. Open **«Schedule»** in the menu.
2. Free slots can be selected. «Taken» is other people's time, «Your slot» is your bookings. The «Now · free» cell is the slot running right now — it is given away for free.
3. Select as many slots in a row as you need — the total cost appears at the bottom right away.
4. Click **«Book»** and confirm. Tokens are charged immediately.

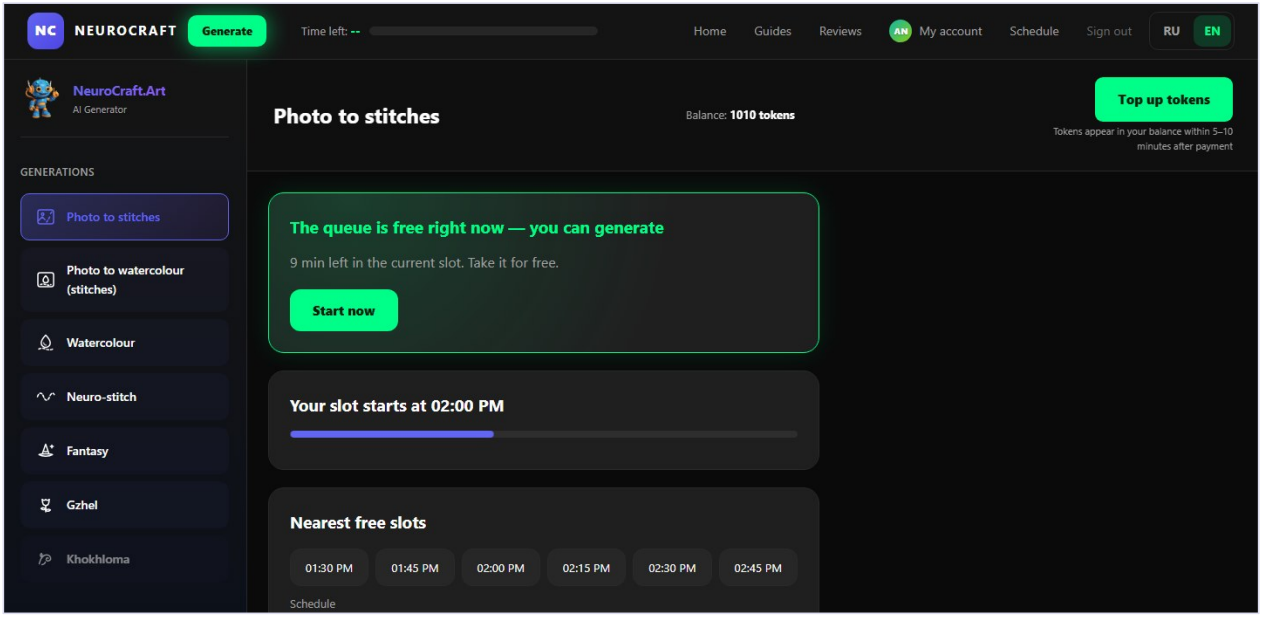

Three slots in a row selected — the total and the «Book» button at the bottom.

> **No cancellation:** a booked slot stays yours, tokens are not returned. You can book up to one hour in a row, so that everyone gets time.

7. Start right now

If nobody is using the generator at the moment, you do not need to wait for your slot. Open «Generate»: when the queue is free, the page itself offers to take the current slot — **for free**.

1. Click **«Start now»**.
2. You have taken the current fifteen minutes and can work. You pay only for the pictures.

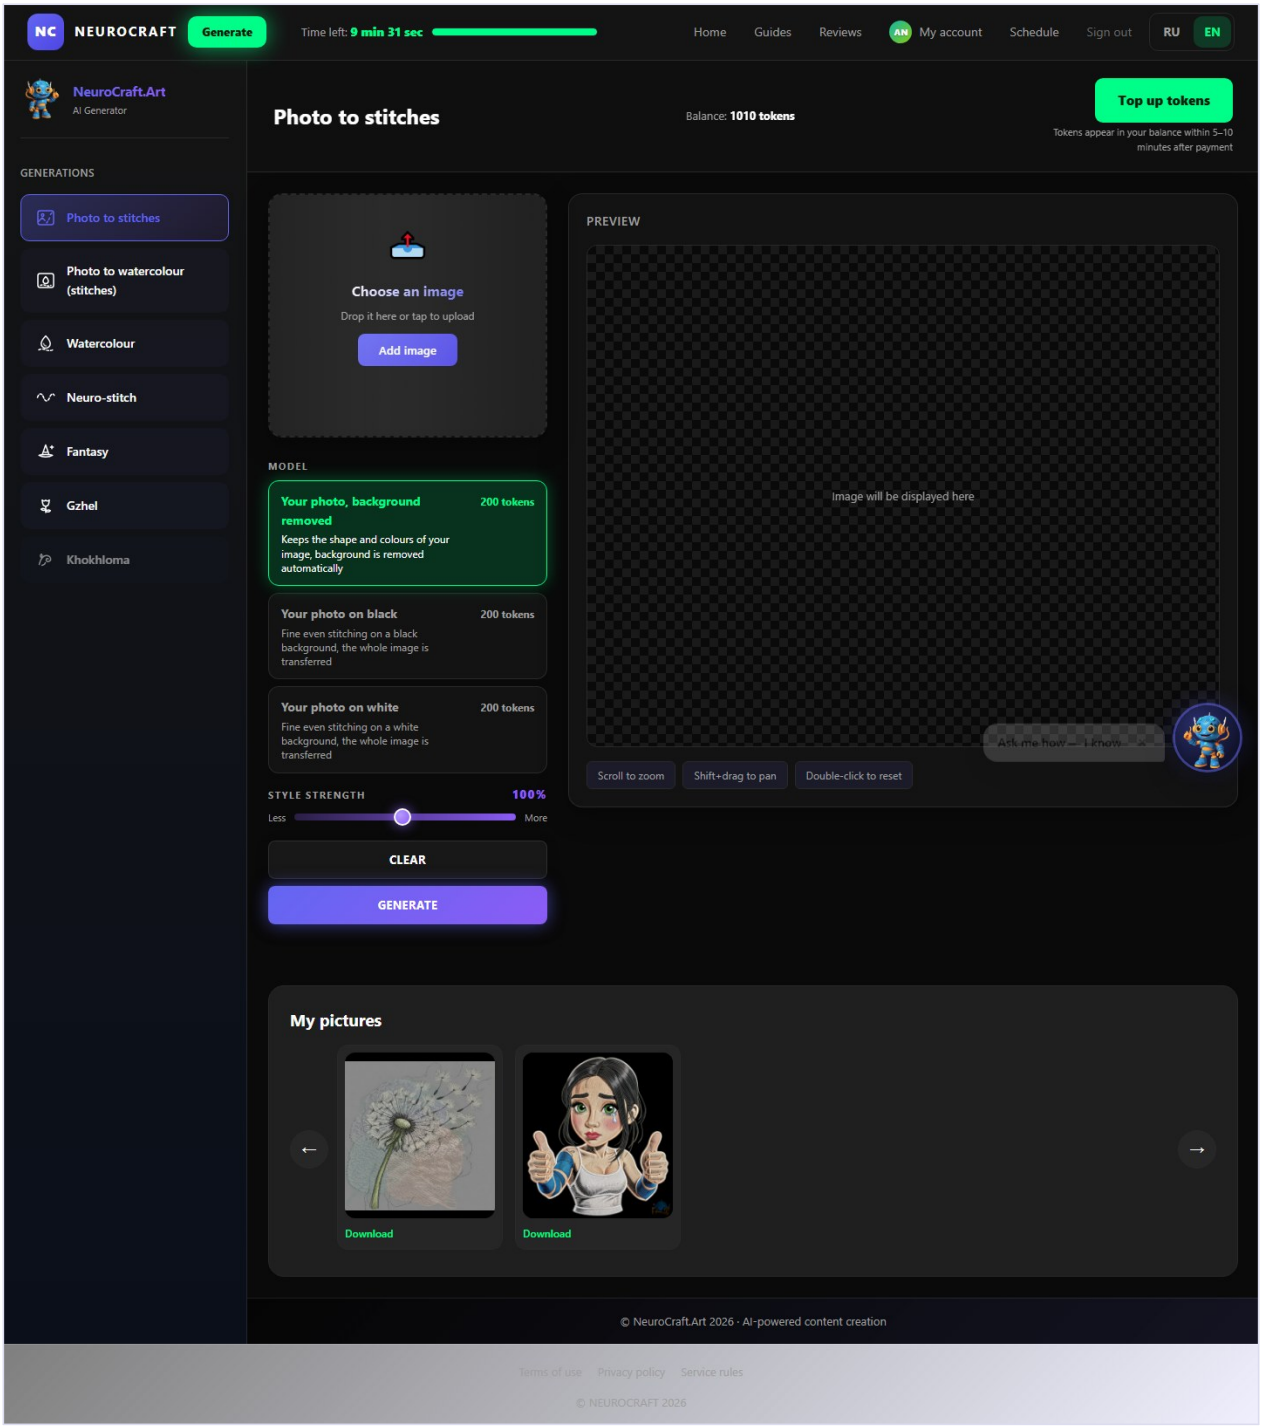

The queue is free: the «Start now» button. Below — the nearest free slots.

At the top of the page you can see how many minutes are left in your slot. When there is no longer time for another picture, the site warns you. And if you booked a later slot, just keep the page open — it will open by itself when your time comes.

8. Your photo to stitches

1. Open the **«Photo to stitches»** section.
2. Drag a photo into the field on the left, or click it and choose a file. A phone photo is fine.
3. Choose a model — how to process the photo.
4. If you like, move the **«Style strength»** slider: less — closer to the original, more — bolder embroidery.
5. Click **«Generate»**. One picture takes about a minute, the first one sometimes a little longer.

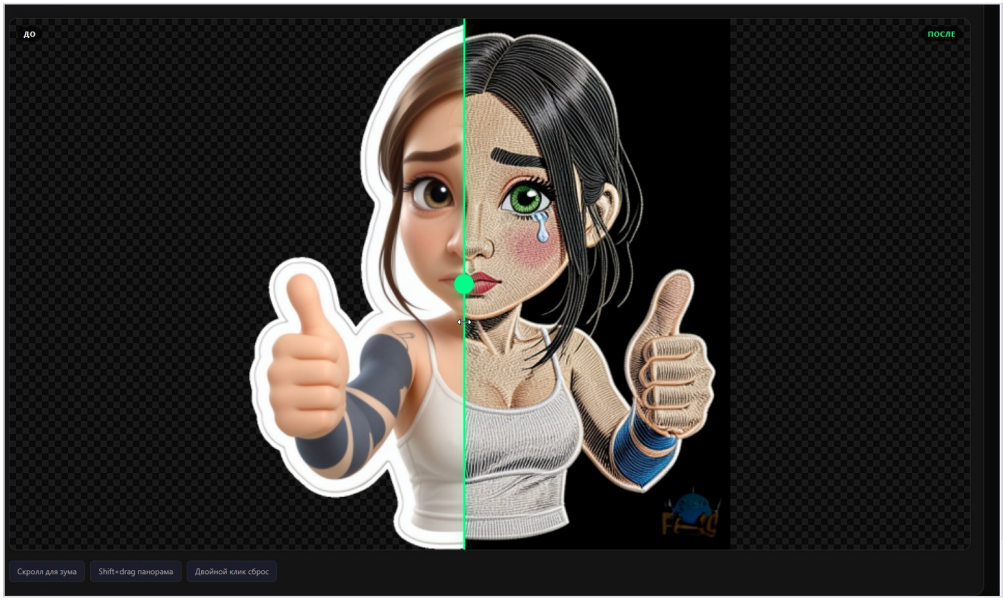

The «Photo to stitches» page: the photo field, three models with prices, the strength slider and the «Generate» button. At the top — time left in your slot.

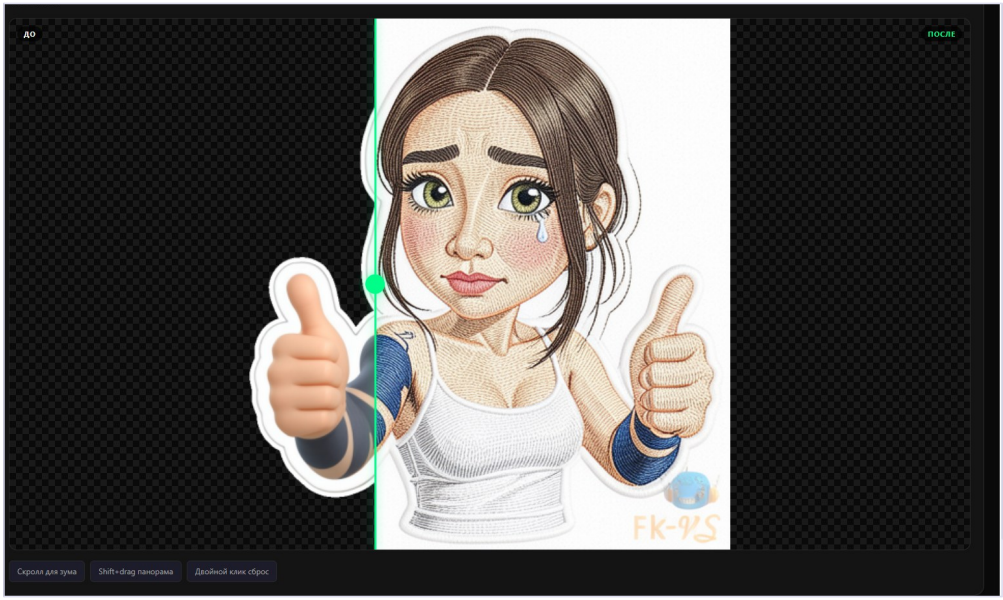

Three models

Model	What it does	When to choose it
Your photo, background removed	Keeps the shape and colours of your image, the background is removed automatically	An object or character without background — for a patch, a sticker
Your photo on black	Fine even stitching on a black background, the whole image is transferred	Striking «night» embroidery, dark fabric

Model	What it does	When to choose it
Your photo on white	Fine even stitching on a white background, the whole image is transferred	Light fabric, a delicate design

Result of «Your photo on black». Drag the green bar to compare before and after.

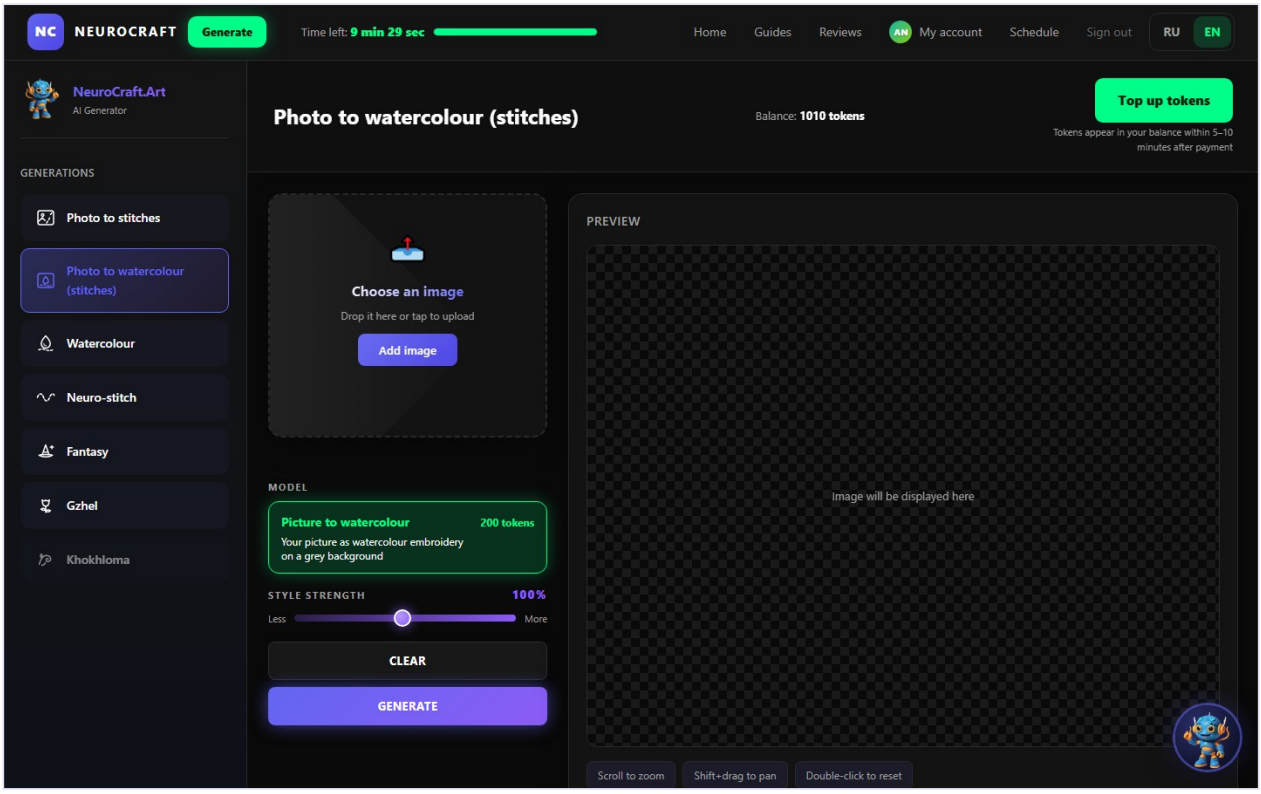

The same picture with the «Your photo on white» model.

> The mouse wheel zooms in so you can look at the stitches; a double click resets the view. Photos with one clear object and nothing extra around it work best.

Photo to watercolour (stitches)

A separate menu section: your photo becomes watercolour embroidery on a grey background — a thread outline, hatching and colour patches. You upload the photo and use «Style strength» the same way.

The «Photo to watercolour (stitches)» section.

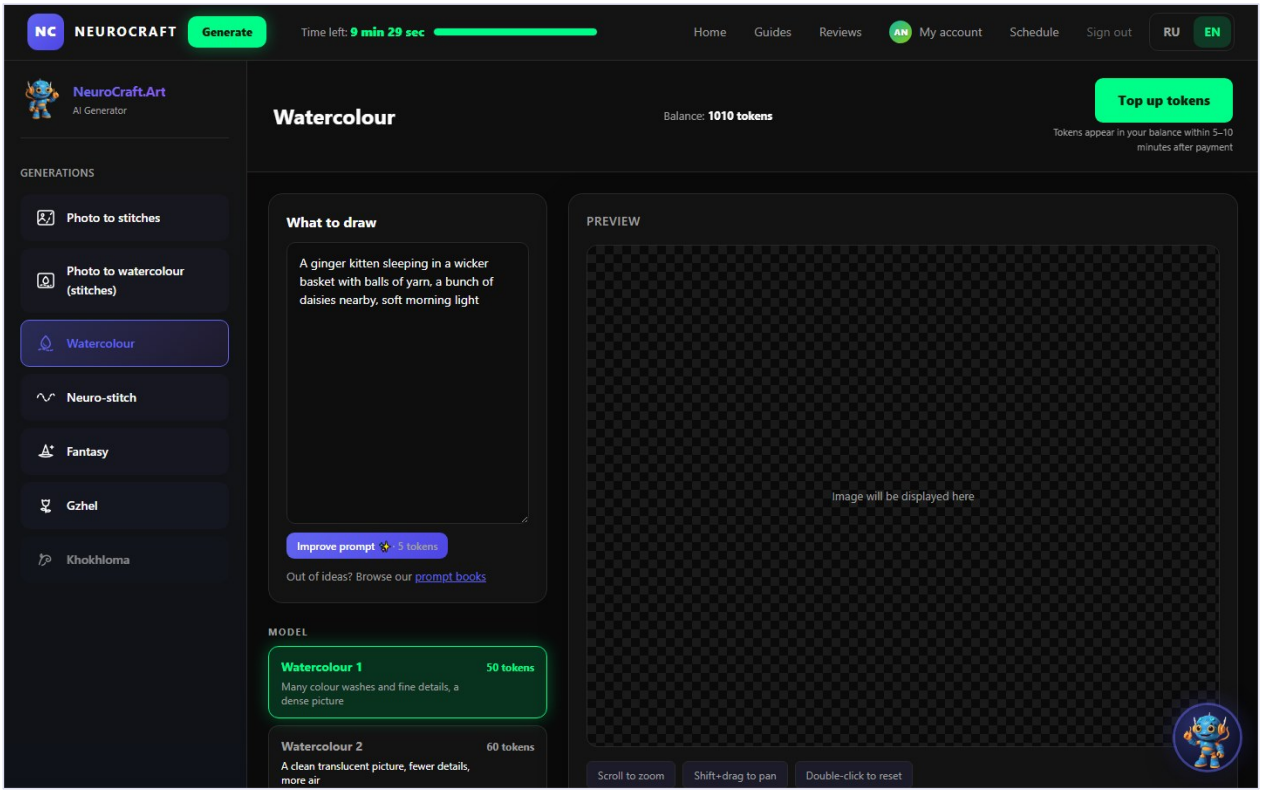

A «Photo to watercolour» result.

9. Drawing from a description

The «Watercolour», «Neuro-stitch», «Fantasy» and «Gzhel» sections do not need a photo: you describe in words what to draw.

1. Open the section you need in the menu on the left.
2. In the **«What to draw»** field describe the object, its colours and what is around it. Write simply, as you would tell a person. English or Russian both work. Out of ideas? There is a link to our prompt books right under the field.
3. Choose a model and click **«Generate»**.

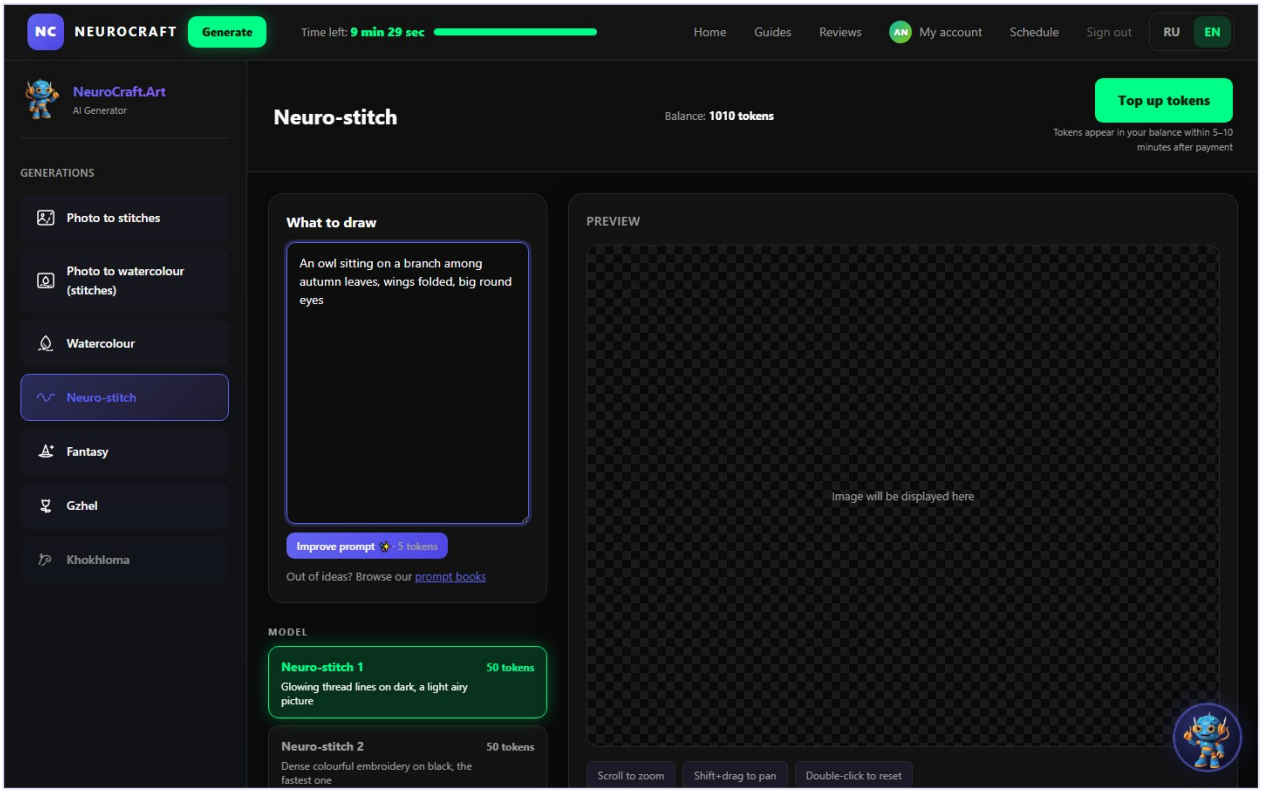

The «Watercolour» section: the description and two models.

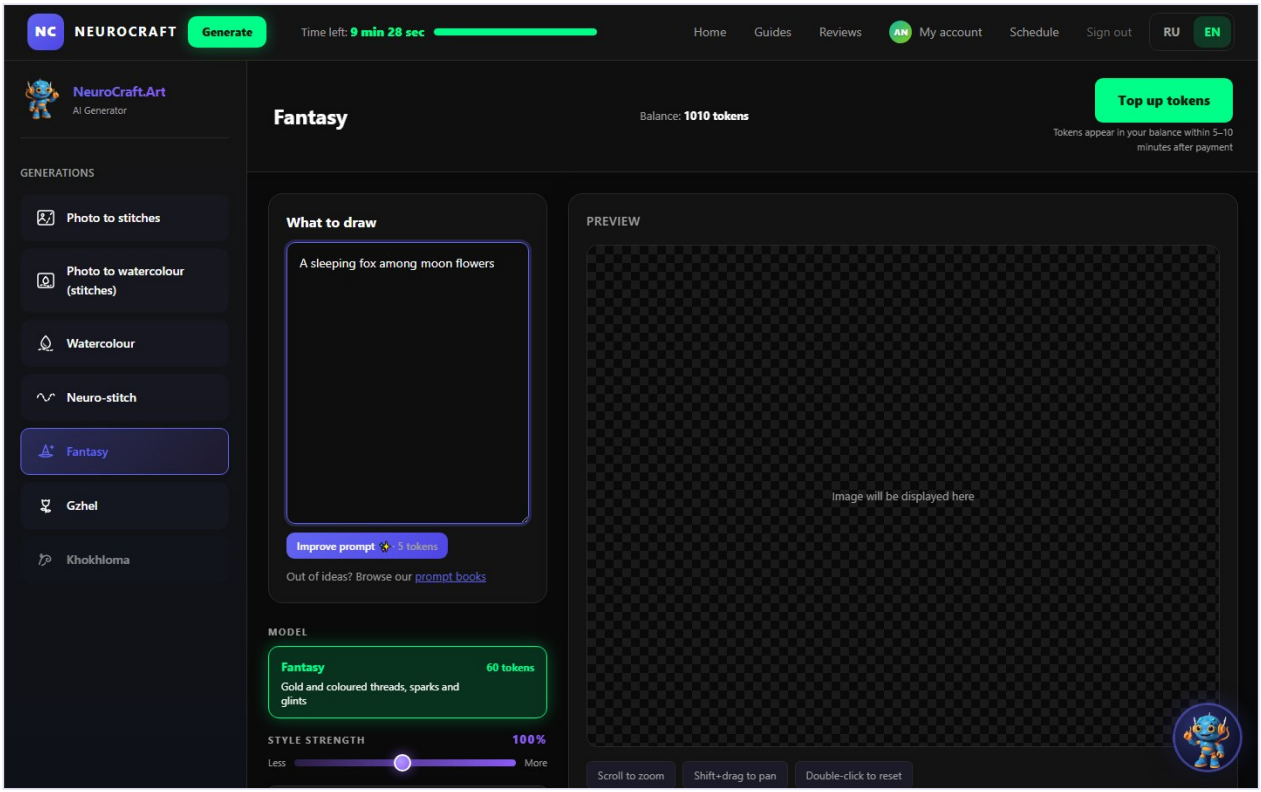

Model	What the picture looks like
Watercolour 1	Many colour washes and fine details, a rich picture
Watercolour 2	A clean translucent picture, fewer details, more air
Neuro-stitch 1	Glowing thread lines on dark, a fine airy design
Neuro-stitch 2	Dense colourful embroidery on black, the fastest one
Neuro-stitch 3	Bright satin stitch on dark, large even stitches
Fantasy	Gold and coloured threads, sparks and glints
Gzhel 1	Cobalt on white, soft transitions, the fastest one
Gzhel 2	Crisp stitches, good for borders and single motifs

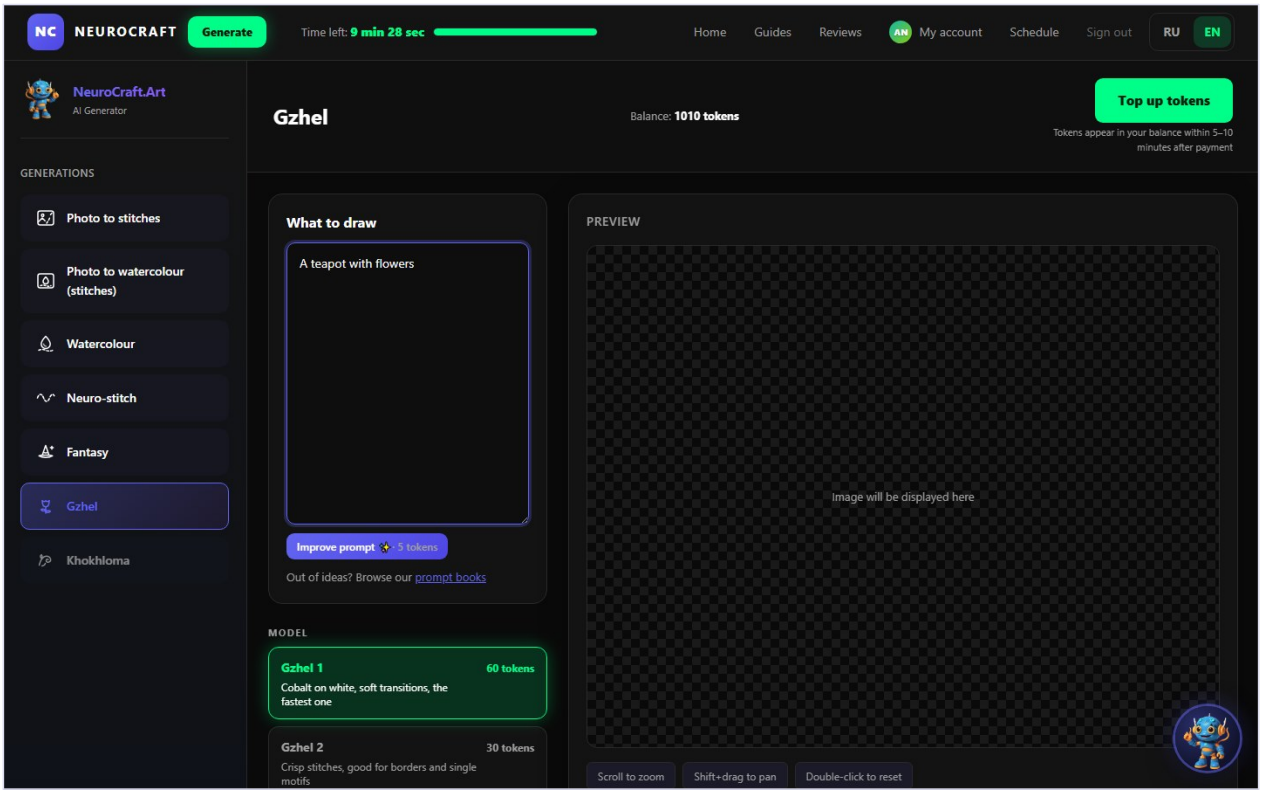

Result of «Watercolour 2». The same description gives different pictures in different models — try them and pick yours.

The «Neuro-stitch» section: three models to choose from.

The «Fantasy» section. Describe a fairy-tale scene — the style adds the gold, the sparks and the dark background itself.

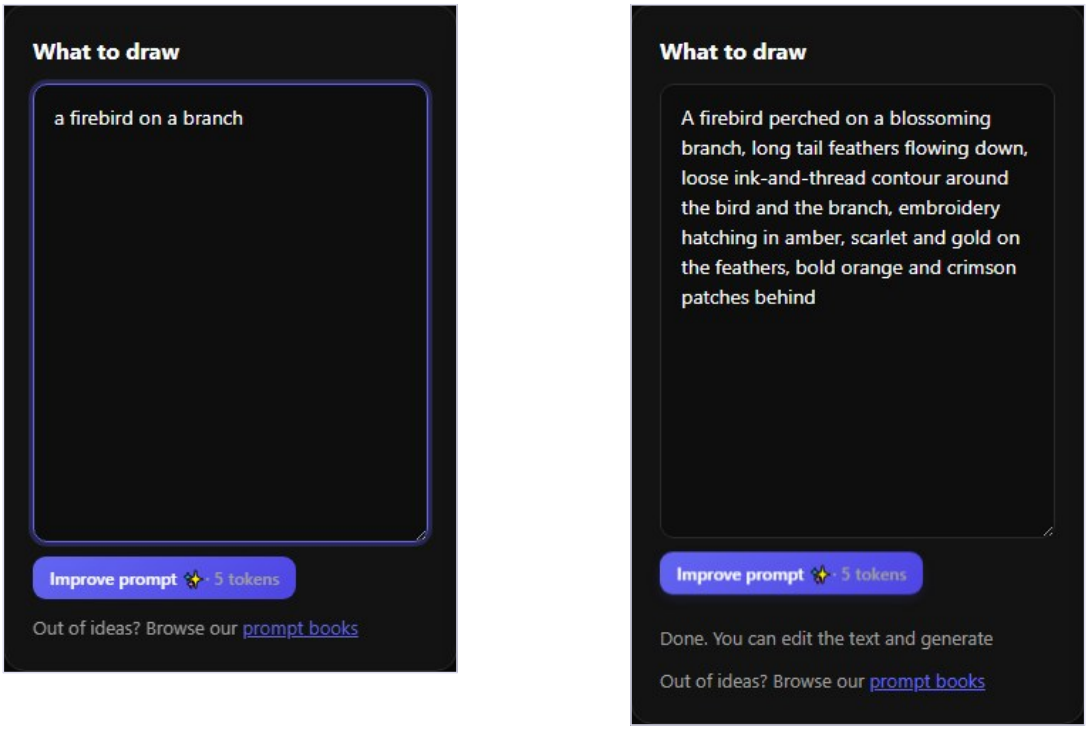

The «Gzhel» section: two models. Describe the object itself — the generator adds the cobalt pattern.

10. Improve prompt

Not sure how to describe a picture in detail? Write a few words — the generator expands the description following the rules of the chosen style.

1. In the «What to draw» field write briefly, for example: «a firebird on a branch».
2. Click **«Improve prompt □»** under the field. It costs 5 tokens.
3. In a few seconds a detailed description appears in the field. You can edit it by hand.
4. Click **«Generate»**.

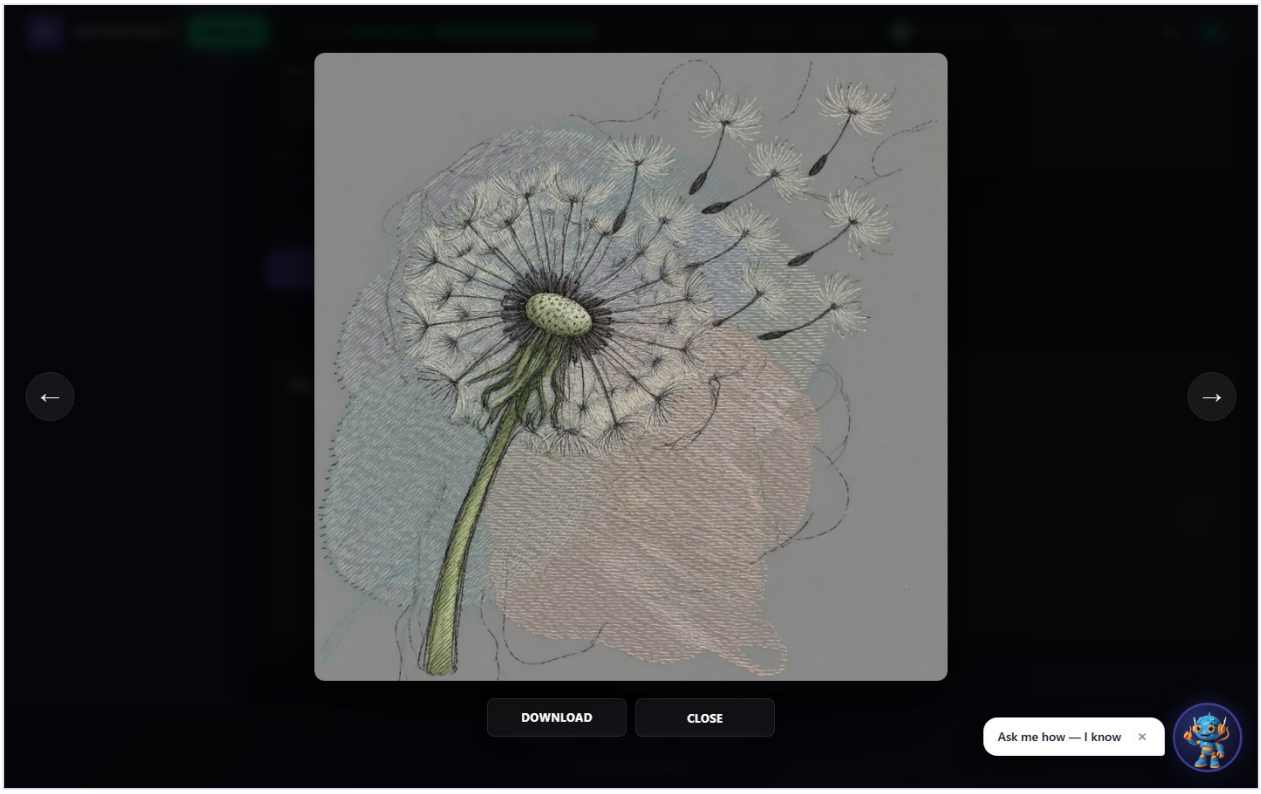

Left — a short description and the «Improve prompt» button. Right — the same description after improving.

> While the description is being improved, the «Generate» button waits — so you do not spend tokens on the old text. If improving fails, the 5 tokens go back to your balance. The button is in every section that draws from a description.

11. Download and keep your pictures

- Like a picture — click **«Download»** under the result. It is saved to your computer or phone.
- Everything you make is collected at the bottom of the page in **«My pictures»**. Click a thumbnail — the picture opens large, with a «Download» button there too.
- The same pictures are in your account in the «My pictures» section.

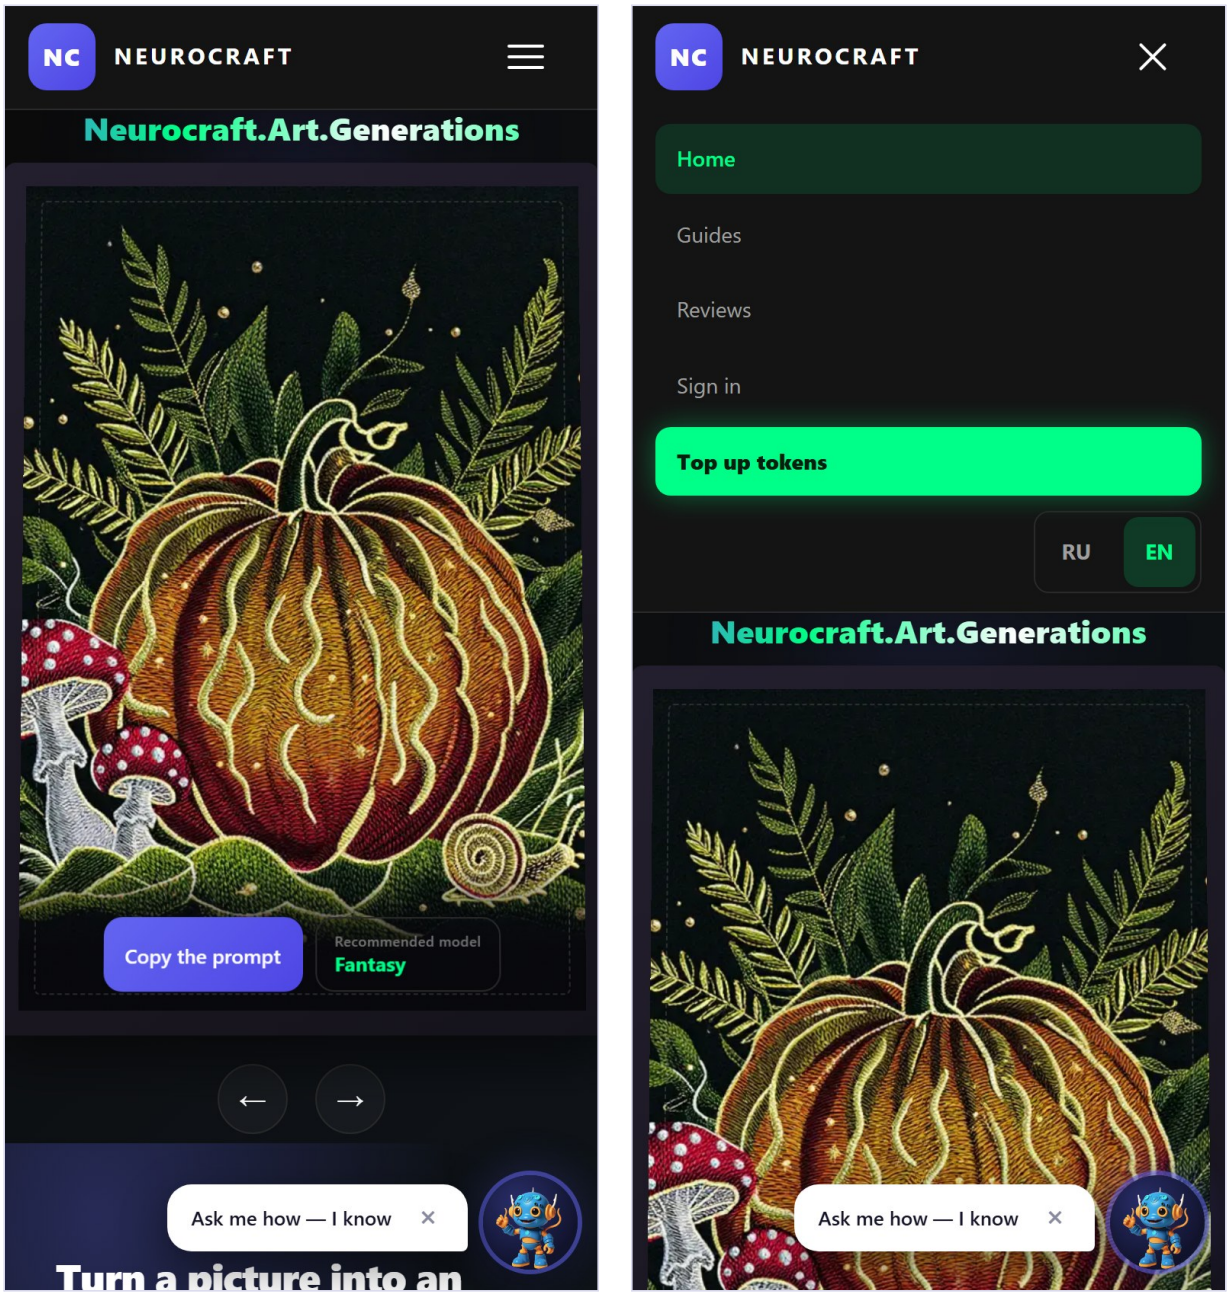

The viewer: arrows flip through the pictures, «Download» and «Close» at the bottom.

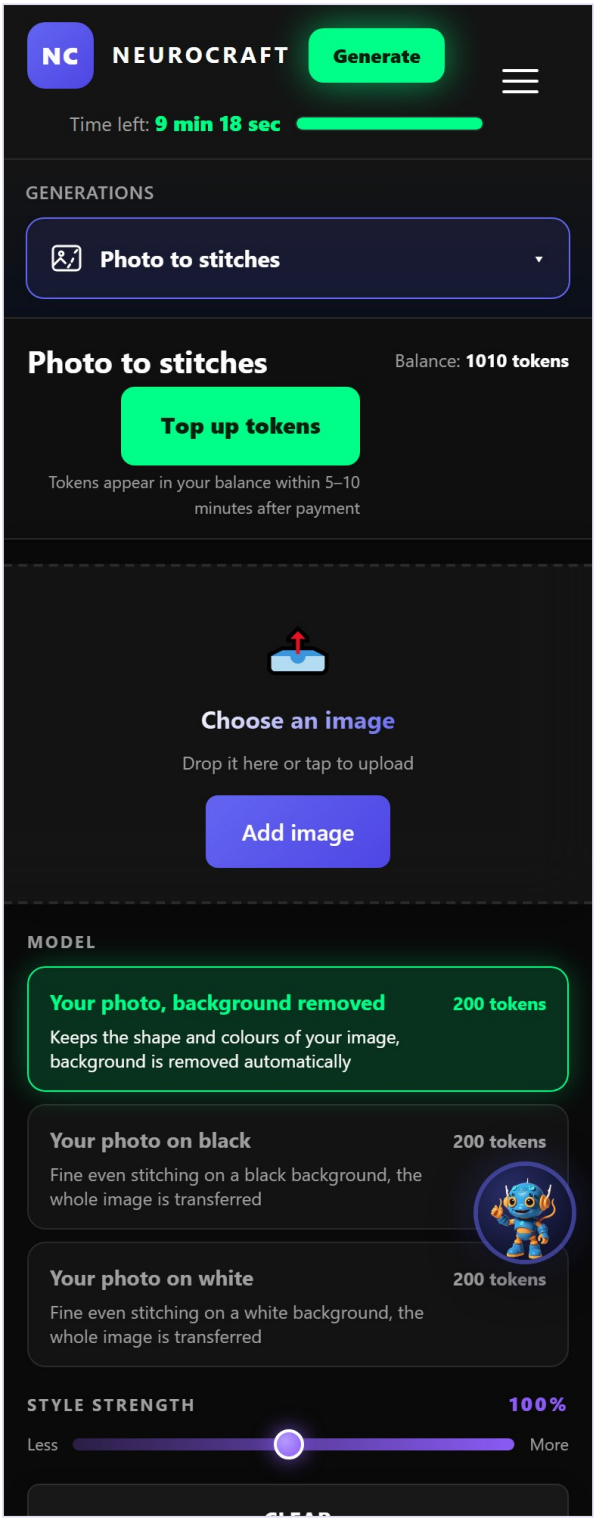

> **Pictures are kept for 24 hours.** Download the ones you like right away, while you work: after 24 hours they disappear from your account.

12. On a phone

The site works the same on a computer and on a phone. On a phone the menu hides under the three-line button in the top right corner, and the generator sections are chosen from a drop-down list.

The home page on a phone and the open menu.

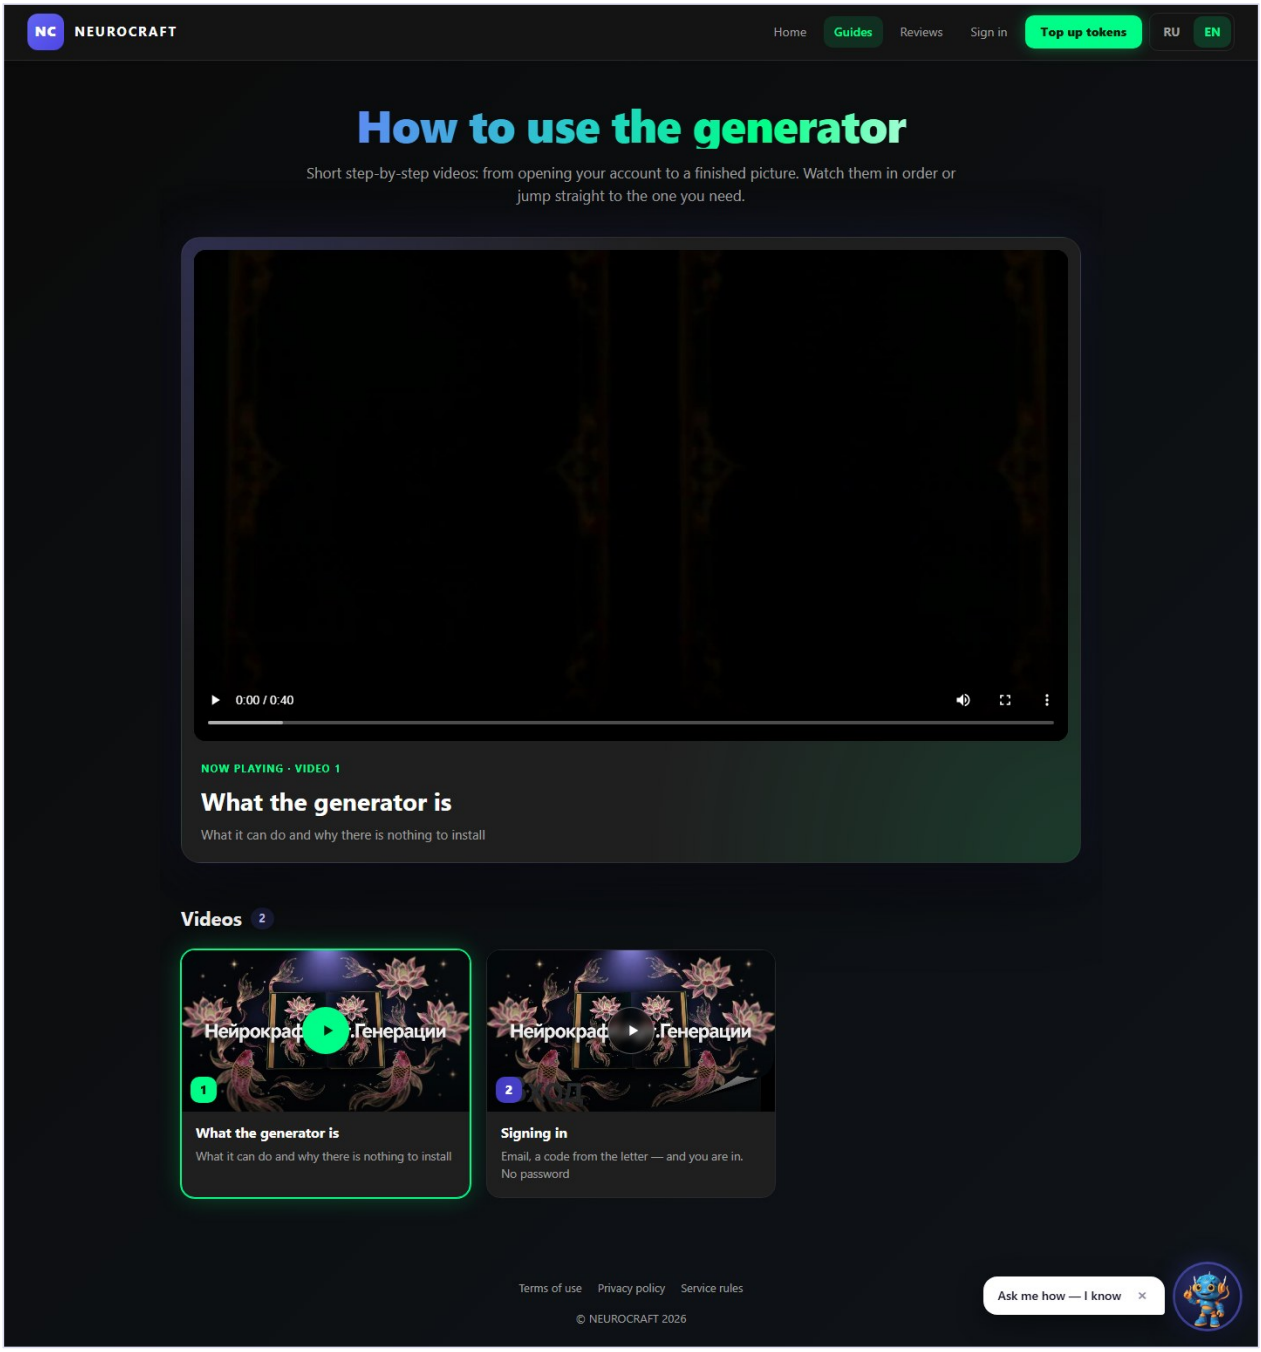

The generation page on a phone: photo, models, button — all in one column.

13. Video guides on the site

You can watch all of this as short videos. Open **«Guides»** in the site header — the page is open to everyone, even without signing in.

- At the top — a large player. Below — all the videos in order: click a card and the video moves into the player.
- At the bottom of the page — this guide as one PDF file in Russian and English.

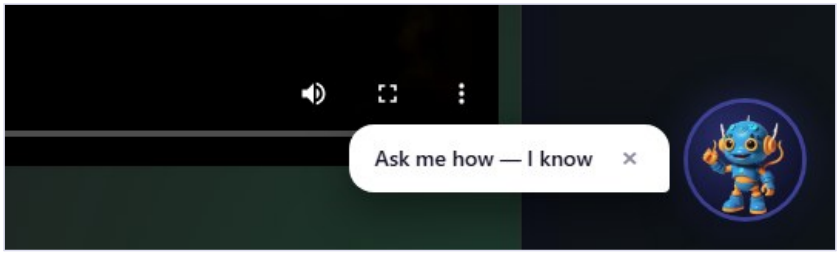

The «Guides» page: the player and the video cards.

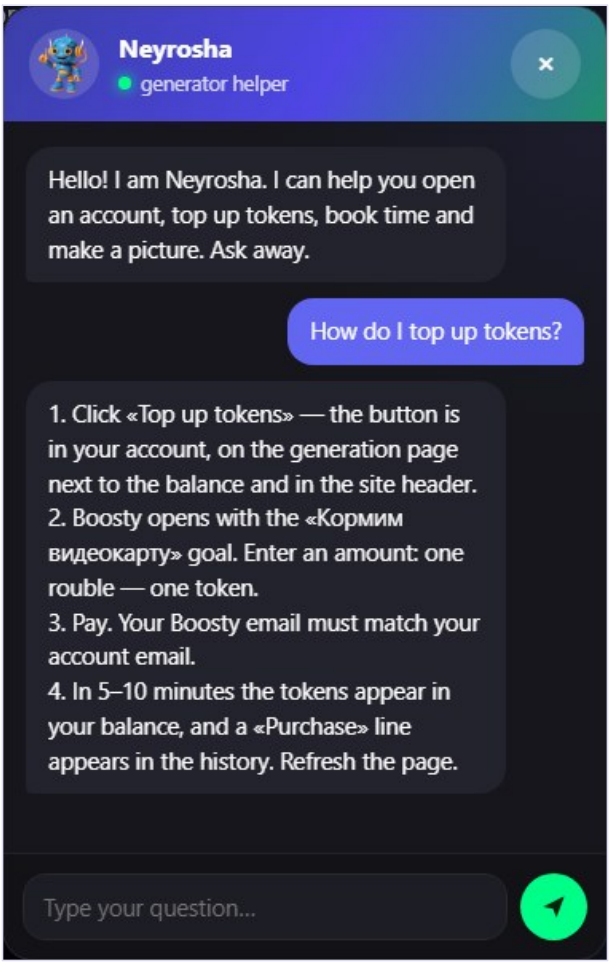

14. Neyrosha — the chat helper

Our robot Neyrosha lives in the bottom right corner of the site. It answers questions about the generator: how to open an account, top up tokens, book time, make a picture.

1. Click the robot in the bottom right corner — the chat window opens.
2. Type your question in your own words or click one of the ready-made questions.
3. The answer comes in a few seconds. The first answer can take up to a minute.

The robot and the caption «Ask me how — I know».

Neyrosha's answer to «How do I top up tokens?».

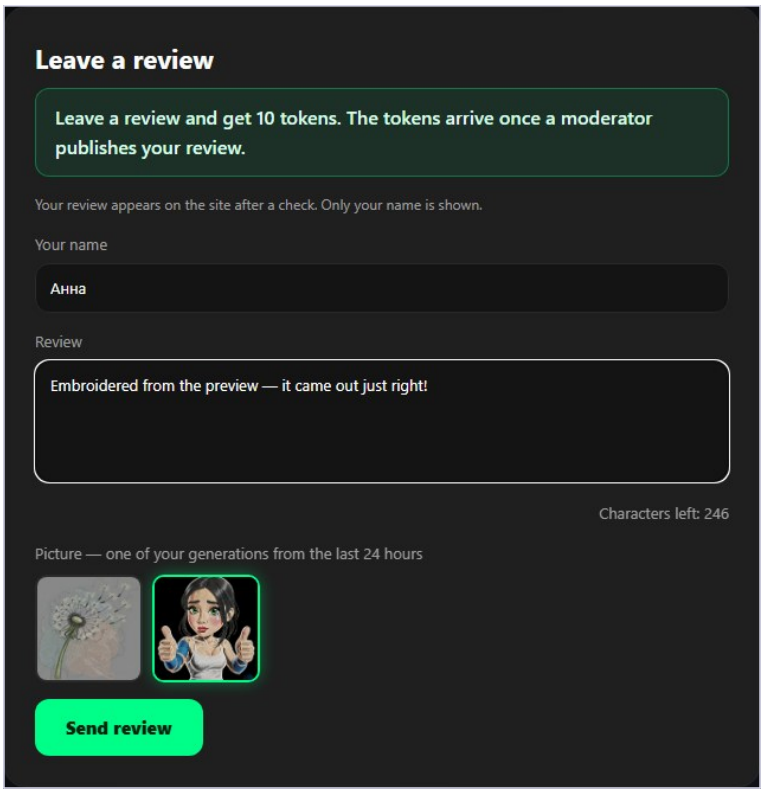

> When you are signed in, Neyrosha knows your balance, bookings and pictures and can answer, for example, «how many tokens do I have» or «when is my booking». The conversation is kept: come back and you will see it. If Neyrosha does not know the answer, it gives the contacts of Oksana and Natalia.

15. Reviews

Reviews from subscribers are on the home page under «Reviews» and on a separate page: «Reviews» in the site menu.

> **A review earns 10 tokens.** They arrive in your balance once a moderator publishes the review, and they never expire. Every published review earns its own tokens.

1. Make a picture in the generator — a review takes only your own generation from the last 24 hours.
2. Sign in and open «Reviews» → «Leave a review».
3. Write your review — up to 300 characters, the counter under the field shows how many are left.
4. Choose a picture from your generations and click «Send review».

The review form: the bonus, name, text and one of your generations.

While a review awaits moderation, only you can see it — under «Your reviews awaiting moderation». Only your name is shown on the site.

16. If something goes wrong

What you see	What it means and what to do
The email with the code does not arrive	Wait a couple of minutes and check the Spam folder. Do not click the button again: while the first code is valid, a second email will not be sent. After 15 minutes you can request a new one.
The code is not accepted	Check that you entered all six digits without spaces. After five mistakes the code expires — request a new one.
«There is no account with this email yet»	Check the email. If you really have no account yet, click «Top up tokens» — it will open by itself (section 3).
I topped up, but there are no tokens	Wait 5–10 minutes and refresh the page. If they have not arrived after 15 minutes, check that your Boosty email is the same as your account email, and write to the manager.
«Not enough tokens»	Your balance is lower than the price of the booking or the picture. Click «Top up tokens».
«That slot has just been taken»	Someone was faster. Choose another slot.
«It is not your slot right now»	Generation works only in booked time. Book a slot in the schedule or click «Start now» if the queue is free.
«Could not improve the prompt»	The tokens for improving have already been returned. Try again.
Neyrosha did not answer	Try again in a minute or write to the manager — contacts below.
«Could not open this image»	Choose another photo — JPEG or PNG works.
A picture disappeared from the account	Pictures are kept for 24 hours. Next time download it right away.

Help

If you cannot sign in, your tokens have not arrived or something does not work — write to Natalia on Boosty, or to the manager Oksana:

- **Telegram:** @Oksana_Afrosina
- **VK:** vk.ru/id77260107
- **Phone:** +7 916 707 5734

> Enjoy! Book a slot, upload a photo or write a few words — and take your embroidery preview.
